

Team Rubicon Recruits Four Medical Experts in 48 Hours with H1 Connect

H1 Connect Selected Cholera Experts for Zambia EMT Mission

Background: Doctors Deployed to Support Cholera Outbreak

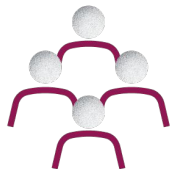

Beginning in late 2023, there was an outbreak of cholera in Zambia, which the CDC has called the largest in over 20 years. Team Rubicon was one of the organizations that responded to the crisis by proactively seeking to build a response team in case of an official Request for Applications from the World Health Organization.

Team Rubicon is a veteran-led humanitarian organization that serves global communities before, during, and after disasters and crises. They reached out to H1 to help them find four qualified doctors to prepare for potential deployment.

The Ask

Team Rubicon tasked H1 with helping them quickly build a team of cholera experts who would be interested in deploying to Zambia to provide clinical decision support and serve in an advisory capacity to Zambian clinicians to contain the spread of cholera.

Outcome

H1 utilized their database of 1M+ doctors along with advanced AI technology to identify and contact doctors that fit the required criteria. Within 48 hours, H1 produced a shortlist of qualified candidates to support Team Rubicon's deployment needs.

When Team Rubicon needed to quickly assemble a team of cholera experts for a potential deployment to Zambia's largest outbreak in over 20 years, they turned to H1. Using its extensive database of over 1 million doctors, H1 swiftly identified and connected Team Rubicon with qualified candidates in just 48 hours—something that would have been impossible without its vast healthcare network. Thanks to H1, Team Rubicon was fully prepared to respond to the crisis with expert support.

What Is H1 Connect?

The mission of H1 is to connect the world to the right doctors. The H1 Connect team furthers that goal by connecting NGOs with doctors looking for volunteer opportunities. NGOs commonly encounter challenges with finding qualified HCPs with availability at times of deployment. H1 Connect helps bridge that gap by partnering with leading NGOs to build a global network of physician volunteers in a communal “ready reserve.”

The H1 Connect network has grown significantly with the need for
global volunteer-focused HCPs

Why H1 Connect?

Benefit to NGOs

Engaged & Trained Doctors:

Doctors on your roster will be engaged and trained throughout the year

Shared Learnings:

Doctors can bring best practices from one NGO's medical deployments to another's

Larger Roster:

NGOs have access to a larger pool of doctors to pull from for rapid EMT mobilization

Benefit to HCPs

Expand Reach:

Doctors will be part of a global "reserve roster" that's connected directly with organizations deploying around the world

Grow Experience:

Doctors can connect with NGOs and other healthcare professionals for networking opportunities and career growth

Access Training & Resources:

Doctors can access training, webinars, and other assets to enhance their global health insights

Connecting the world to the right doctors

H1 is the connecting force for global HCP, clinical, scientific and research information. H1's platform democratizes access to HCP knowledge and groundbreaking insights for life sciences, academic medical institutions, health systems, and payors. Our data ecosystem fuels a robust product suite that helps customers discover and engage industry experts, drive equitable research, access groundbreaking science, and accelerate commercial success with the most robust and accurate healthcare professional data.
